LEED PRODUCT INFORMATION (recycled product content in rolled steel products)

ARTROM STEEL TUBES located in Draganesti Street, no.30, Slatina(Plant 1,Pipe Production) produces seamless tubes for industrial applications, mechanical engineering and automotive industry using billets steel produced in his own facility (Plant 2,Steel Production,Resita) .

The billets used in rolling mill are manufactured using exclusively electric arc furnace followed by continuous casting process . **Electric arc furnace is fed with 100% recycled material.**

All the steel produced in our facilities use 100% scrap from European market .

Before to be used in the manufacturing process, the scrap metal is subject to a rigorous quality control according to European Steel Scrap Specification.The verification also includes radiological testing starting with reception and ending with delivery of the products.
