Environmental Statement concerning

Regulation (EU) 2024/590 of the European Parliament and of the Council of 7 February 2024 on substances that deplete the ozone layer, and repealing Regulation (EC) No 1005/2009
and

Regulation (EU) 2024/573 of the European Parliament and of the Council of 7 February 2024 on fluorinated greenhouse gases, amending Directive (EU) 2019/1937 and repealing Regulation (EU) No 517/2014

Regulation (EU) 2024/590 of the European Parliament and of the Council of 7 February 2024 on substances that deplete the ozone layer was designed to reduce the production and consumption of Ozone Depleting Substances (ODS) in order to reduce their abundance in the atmosphere, and thereby protect the earth's fragile ozone layer.

Regulation (EU) 2024/573 of the European Parliament and of the Council of 7 February 2024 on fluorinated greenhouse gases, is a significant piece of legislation concerning fluorinated greenhouse gases (F-gases). These gases, such as hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF6), are potent contributors to global warming when released into the atmosphere. The regulation aims to reduce the emissions of F-gases, which are many times more potent than carbon dioxide in terms of their global warming potential. By doing so, the EU seeks to contribute to its commitments under the Paris Agreement and improve the EU's overall environmental sustainability.

At ARTROM STEEL TUBES S.A we are committed to environmental responsibility and sustainability. We proudly declare that our products, manufacturing processes, and services are aligned with the highest standards of environmental protection.

We confirm that none of our products contain fluorinated greenhouse gases (F-gases) regulated under EU Regulation (EU) 2024/573.

Additionally, we affirm that our products do not contain ozone-depleting substances (ODS) as outlined in EU Regulation (EU) 2024/590. Our commitment to sustainable practices ensures that our services and offerings are environmentally friendly, supporting the protection of the ozone layer and the health of our global ecosystem.

ARTROM STEEL TUBES S.A remains dedicated to innovation that prioritizes environmental stewardship. We continuously seek out and implement alternative technologies and materials that minimize our impact on the environment. Our pledge is to uphold these principles as we strive towards a greener and more sustainable future.

Sustainability Manager,
