Facility-Specific Steel Product GHG Emissions Intensity

Reporting Year 2024

Value: t CO₂e/t hot-
rolled steel 0.73

Product Type Flat

Steel Climate Standard Conformance

Emissions Intensity for Corresponding Year (t CO ₂ e/t hot-rolled steel)	1.38	Is the facility-specific steel product emissions intensity at/below the Standard?	Yes
--	------	---	-----

Statement of Scope: Product values were developed in conformance with the GSCC® Steel Climate Standard for long and flat products. Values are indicated as tons of CO₂e per metric ton of hot-rolled steel. For more information, visit [GlobalSteelClimateCouncil.org](https://www.GlobalSteelClimateCouncil.org).

Validity

Issue Date	15 July 2026
Expiry Date	14 July 2028

Product Emissions Intensity Self- Declaration Due Date	01 May 2027
--	-------------

The Facility-Specific Steel Product GHG Emissions Intensity values provided herein were certified by the member company's GSCC®-approved certification body and reviewed anonymously by the GSCC® Technical Committee according to the flowchart outlined in Appendix C of the Supplemental Technical Guidance. The values are confirmed to be in line with the glide path to achieve the Paris Climate Agreement's 1.5° C scenario by 2050 goal.
